			%	%	%
			%	%	%
			%	%	%

1. List Each Material Type (include materials recycled both from the Annual MSW Recycling List and the Expanded Materials List)
2. This information is important so that DSM does not double count material that is handled by another recycler that participates in our survey.
3. If you handle recycling material generated outside the state of Delaware, estimate the percent of material from Delaware only .

NON-DISCLOSURE	
The information provided is confidential. Check one:	<input type="checkbox"/> Yes <input type="checkbox"/> No
<small>DSM Environmental Services, Inc. (DSM) will hold confidential any information and data provided to us which you specify as confidential, as part of the Delaware Statewide Municipal Recycling Annual Report that DSM is conducting for the Delaware Recycling Public Advisory Council (RPAC). The purpose of the study is to develop reasonable and professional estimates of the quantity of material recovered for recycling from residential and non-residential activities located in Delaware, and to ensure no double counting of material occurs. Data provided to DSM will be aggregated with all other material quantities reported to develop a single, annual quantity (in tons) of material recycled for each material type which will be reported in RPAC's annual report. Note that participating company names and participation status may be provided to RPAC upon request.</small>
